

Executive Director of Iberdrola Distribución Eléctrica, S.A. (Sociedad Unipersonal)

Telecommunications Engineer from the Bilbao Advanced Technical School of Engineers. General Management Programme MBA from Esade and Corporate Entrepreneurship degree from the Babson Business School.

Married with three children.

EXPERIENCE RELEVANT TO HIS DUTIES AT IBERDROLA:

Energy industry

He completed the first edition of the IMD Global Leadership Programme and is currently enrolled in the Driving Leadership Transformation programme being taught by IESE and IMD.

He was involved in the telecommunications industry until he joined the Iberdrola Group in 1996, where he had a range of responsibilities in managing the departments of communication operations, development and communications maintenance, projects and services and PLC development.

He managed the launch of telecommunications operator Navega in Guatemala and NeoSky in Spain, both linked to the Iberdrola group.

Until recently he managed the Operational Smart Grid and Grid Automation department, among whose responsibilities was the leadership of the Star project (deployment of the smart meters) in Iberdrola Distribución Eléctrica, S.A.U.

On 9 February 2017 he was appointed responsible for the Company Processes and Technology Division. Some of the main duties of this position involve IT systems, monitoring and protection, equipment standardisation, services and processes, sustainability and environment. He manages smart grid projects in Spain.
